

List of Potential Thesis/Dissertation/Capstone Subjects with State of Colorado Archaeology or Paleontology Collections Needing Rehousing Care, Re-analysis or New Interpretational Opportunities

The following tables represent a non-comprehensive list of archaeological and paleontological locations organized by time periods that have been either excavated or tested under the approval of a permit issued by the State Archaeologist of Colorado under the authority of C.R.S. § 24-80-401 to 410 through 8CCR 1504-7. These sites have the potential for their associated collections to be the subject of new research, analysis, interpretation or public exhibition. The collections are housed in various State-approved repositories. Inquiries regarding a site location's collection can be matched to a repository through an inquiry to the State Archaeologist's Office. The artifacts/specimens from these sites may need re-housing to current collections care standards and practices. As such, these collections hold the possibility of being the subject of research/curation/educational grant funding opportunities and are therefore encouraged to be considered by students of various levels of higher educational training as the subject of thesis/dissertation or special capstone projects.

For inquiries, please contact the State Curation Coordinator at 303-866-4607 or at HC_StateCuration@state.co.us History Colorado, Office of the State Archaeologist, 1200 Broadway, Denver, CO 80203
